

## Santosh Panday

*Industry 4.0 Leader | Digital Manufacturing Strategist | Industrial AI Mentor*

Santosh Panday is a globally recognized authority in **manufacturing digital transformation**, with 18 years of experience leading large-scale technology and **Industry 4.0** initiatives across sectors like Chemicals, cements, metals, polymers, textiles, power and carbon black. He has played a pivotal role in shaping and executing digital strategies that have transformed legacy operations into **smart, sustainable, and value-driven enterprises**.

He is a:

- **Certified Energy Auditor** – Bureau of Energy Efficiency (BEE), Ministry of Power, Government of India
- **Certified Industrial Cybersecurity Practitioner** – with hands-on expertise in securing converged OT-IT ecosystems
- **Keynote speakers in global forums of Smart manufacturing, process optimization and Industrial AI**
- **Awardee – Smart Manufacturing Summit India Award 2022**, Brainalytics India (*Manufacturing Excellence & Thought Leadership*)
- **Recipient – Digital Transformation Summit India Award 2022**, Exito (*Contribution to Manufacturing Digital Transformation*)
- **Pro bono technology advisor to nonprofits** driving grassroots and sustainability efforts

### Core Areas of Expertise:

- **Industrial AI & Predictive Analytics** – Building hybrid model both domain and machine learning-driven solutions for maintenance, process optimization, and energy efficiency. Developed unique framework of self-serviced AI driven Manufacturing Analytics with GenAI and Agentic approach.
- **Industrial DataOps & Knowledge Graphs** – Designing scalable, contextual data infrastructure for real-time insights
- **Digital Manufacturing Strategy** – Driving end-to-end roadmaps for smart factories, IIoT adoption, and value realization
- **Energy & Asset Performance Management** – Delivering measurable impact through compressed air optimization and reduced specific energy consumption
- **Cybersecure Digital Adoption** – Leading secure digitalization efforts aligned with global standards

- **Global Leadership** – Expert in building and mentoring **high-performance cross-functional global teams** to accelerate digital transformation and innovation

As a mentor, Santosh brings a unique combination of technical depth, strategic vision, and grassroots execution. He can support startups in:

- Refining their product-market fit for industrial applications
- Shaping scalable, secure, and enterprise-ready solutions
- Co-creating high-impact POCs with industry and academia partners
- Aligning technology with ROI and operational value
- Navigating the challenges of stakeholder alignment in complex industrial environments

With an Electrical Engineering background (specialized in **Energy Management from IIT Bombay**), an **MBA from NMIMS**, and hands-on experience in enterprise-scale transformation, Santosh is passionate about helping startups succeed in the next wave of Industrial AI and Industry 4.0 innovation.
